PROFILE SUMMARY

Data Analyst & Data Engineer with around 3 years of experience turning complex stakeholder requirements into reliable data pipelines and reporting that reduce reporting turnaround by 50%+ and improve data accuracy by 25%+. Build ETL/ELT pipelines on Azure (Data Factory, Data Lake, Microsoft Fabric) and model data with SQL and dbt into tested star schemas with automated data quality checks. Deliver Power BI and Tableau dashboards and governance documentation across healthcare, finance, and operations.

TECHNICAL SKILLS

Data Engineering: Azure Data Factory (ETL/ELT Pipelines), Azure Data Lake, Microsoft Fabric, PySpark, dbt, SQL (Advanced Queries), SQL Server, DuckDB/MotherDuck, Data Modeling (Star Schema), Data Quality Testing, Git/GitHub Actions CI

Analytics & BI: Power BI (DAX, Power Query), Tableau, Python (Pandas, NumPy, Scikit-learn), Excel (VBA, Pivot Tables, Power Query), R, ERP

CRM & Data Migration: HubSpot CRM (Pipelines, Workflows, Custom Properties, Security), Highrise CRM, Large-Scale Data Migration, Field Mapping, Tag Architecture, Governance Documentation

AI & Predictive Modeling: Generative AI Awareness, Prophet Forecasting, Ensemble Models (Random Forest, XGBoost), Clustering, Anomaly Detection, Regression Analysis

Domain Skills: Healthcare Analytics, Financial Reporting, P&L Analysis, Supply Chain Analytics, Demand Forecasting

PROFESSIONAL EXPERIENCE

CRM & Data Analyst | Important Gifts Inc. (Changing The Present) *Oct 2025 – Dec 2025 | Apr 2026 – Sep 2026 • Remote*

- Spearheaded end-to-end Highrise-to-HubSpot CRM migration for 70,000+ records, owning field mapping, data validation, and production-readiness planning.
- Engineered custom HubSpot property and activity-mapping frameworks preserving 5+ Highrise features, executed phased migration testing, and reduced post-migration cleanup effort by 40%.
- Authored a 200+ page HubSpot CRM migration manual documenting platform architecture, pipelines, workflows, and reporting logic.
- Mapped 100% of Highrise CRM architecture to HubSpot equivalents, identifying 15+ structural gaps and standardizing KPI/governance rules across 4 business units.

Data & Reporting Analyst | Sytex Solutions Inc. *Dec 2025 – Feb 2026 • Remote*

- Designed and delivered 8+ SQL/Tableau dashboards by translating stakeholder requirements into specifications, reducing manual reporting effort by 30% across 3 business units.
- Validated data accuracy across 5+ reporting pipelines to achieve and sustain 99% reporting accuracy for all outputs.
- Streamlined 4 recurring reporting workflows by consolidating redundant data pulls, cutting report preparation time by 25% across 6+ deliverables.

Data & Operations Analyst | Iowa State University *Aug 2024 – Aug 2025 • Ames, IA*

- Spearheaded supply and demand analysis for 50+ campus events, integrating attendance, capacity, and resource data to improve operational readiness by 20%.
- Built Power BI/Tableau dashboards tracking 10+ plan-to-actual KPIs, enabling leadership to identify variances and reallocate resources in real time.
- Consolidated 3 disparate operational systems into one unified dashboard, cleaning 25,000+ records and cutting manual data aggregation time by 45%.

DATA ENGINEERING & ANALYTICS PROJECTS

DecisionGrade Order Analytics — dbt, SQL & MotherDuck (GitHub) *Feb 2026 – Nov 2026*

- Built a governed dbt pipeline on 99K e-commerce orders (medallion layers, star schema, 5 KPI marts) with 90 automated data quality tests in GitHub Actions CI, deployed to a MotherDuck cloud warehouse.
- Found that late deliveries cut average review scores from 4.29 to 2.27 and that carrier transit, not seller handling, drove the 2018 delivery slowdown; published a live dashboard.

Iowa Vehicle Crash Data Analysis — Azure Pipeline & Power BI (GitHub) *Sep 2024 – Nov 2024*

- Built an Azure pipeline (Data Lake Storage, Data Factory, Microsoft Fabric, PySpark, Azure SQL) joining 4 Iowa DOT datasets: 543K crash, 181K injury, and 1.1M driver and vehicle records.
- Analyzed crash trends by hour, weekday, month, and location in SQL and Power BI, and delivered 4 safety recommendations for road agencies, law enforcement, and public health.

U.S. Housing Market Pricing Analysis (GitHub) *Mar 2025 – Jul 2025*

- Cleaned and reshaped 25 years of monthly Zillow data for 894 U.S. metro areas in Python and built Tableau dashboards for trends, seasonality, and post-COVID recovery.
- Forecast prices with Prophet, predicted values a year ahead within about 5% (MAPE) using Linear Regression and Random Forest, and flagged unusual markets with Z-scores and Isolation Forest.

EDUCATION

Master of Science in Information Systems | Iowa State University *Aug 2023 – Aug 2025 • Ames, IA*

Bachelor of Technology in Civil Engineering | Indian Institute of Technology Delhi *Aug 2019 – May 2023 • New Delhi, India*

CERTIFICATIONS

- Google Data Analytics Professional Certificate (Coursera) • Introduction to CRM with HubSpot (Coursera)
- Data Analysis with R Programming (Coursera)
